

Name	RETURNS ON INDIAN EQUITY SHARES
Authors	Dr. L.C. Gupta , Utpal K. Choudhury
Year	July 2000

CONTENTS

PART ONE: INTRODUCTION

1. **OBJECTIVES OF THE STUDY**
 - The need for study
 - The layout of the study
2. **METHODOLOGY**
 - Focus on long-term returns
 - Individual companies and portfolios
 - Two sets of portfolios
 - Holding periods
 - Share prices
 - Definition of returns
 - Bonus and rights issue adjustments
 - Weights for computing portfolio returns
 - Dividends
 - Transaction costs and taxes
 - Details of sample companies

PART TWO : FINDINGS

3. **RETURNS ON EQUITY PORTFOLIOS: THE PAST EXPERIENCE**
 - Periodwise portfolio returns
 - Sensex Portfolio vs. General Portfolio
 - Periods of high returns
 - Periods of low returns
 - Magnitude of variations
 - Two Phases
 - Two components of total return
 - Declining importance of dividend

Returns over 19-year period as a whole
What returns to expect?

4. **ROLE PLAYED BY P/E RATIOS IN DETERMINING RETURNS**

Are you paying a non-sensical price – how do you know?

1980-94: a unique period

Role of the average P/E ratio

P/E ratio and returns

Measurable impact

Summing up

5. **EPS GROWTH AND RETURNS**

Strong empirical proof that fundamentals matter

The EPS in corporate finance theory

The EVA is irrelevant for shareholders

Why EPS normally grows

How is EPS related to returns?

Individual company EPS growth and share prices

EPS and share price relationship

EPS growth rates of Indian companies

EPS growth and rate of return relationship

Growth of portfolio EPS

Sensex Portfolio's EPS growth

EPS growth of the General Portfolio

Growth of portfolio dividends

Summing up

6. **PROBABILITIES OF SPECIFIC RATES OF RETURN**

An exploratory exercise

The probability of loss

Desired minimum returns: applicability

15% minimum return

20% minimum return

25% minimum return

30% minimum return

Implications for future expectations

Dispersion of returns

PART THREEE : CONCLUSION

7. AN INTEGRATED VIEW OF HOW THE MARKET ACTUALLY WORKS

Ever in turbulence

EPS always growing over long-term

The Orbital path

Don't churn the portfolio too much

Guard against high P/E ratio

Long-term safer than short-term
